IEI Video Wall Success Story

One of the largest maritime transportation companies in Taiwan is integrating the iSignager video wall controller into their oil tankers' tracking display systems. The display setup utilizes four 42" LCD monitors to create a 1.9m wide by 1.3m high combined display. A single [VWBOX-E122](#) was chosen for this purpose; taking a single DVI input, splitting the signal into four and resizing the image for the attached monitors. This simple setup, utilizing only a single video box, results in a low-cost and compact installation without complicated hardware. The increased viewing area allows crew members to view onscreen information comfortable from their chairs, without having to stare closely at computer monitors.

All IEI video wall controllers support a variety of the video output signals. The video controllers can be connected to LCD or DLP panels, video wall cubes, projectors or any monitor that accepts a DVI input signal. An SDK is provided for programming custom remote management software for video walls.

About IEI Video Wall Control Box

[VWBOX-E122](#)

- IEI unique GeniMask™ bezel masking technology
- Input with 4 outputs (2x2)
- Support up to 1920 x 1200 input content
- Output content is auto-scaling up to 3840 x 2400 high resolution
- Support multiple display modes, such as full mode, clone mode, etc.
- Allow remote manage the VWBOX via RS-232 cable or DVI cable
- Easy-to-DIY video wall solution

About IEI

IEI provides digital signage solutions including players, content creation software, and management software. Both the player and software are developed in-house. IEI prides itself on being quick and responsive to the needs of customers and offers qualified technology

integration, seamless service and field consultancy.
